

Sunset Meadows Satellite Dish Policy

All satellite dish installations must be Board approved.

Satellite dishes cannot be installed on any roof. Satellite dishes can only be installed below the roofline on the rear patio wall of the owner's unit, and may not encroach on neighbor's property.

All cables must be routed along trim boards to remain as out of sight as possible. Satellite dish placement may not be an option for all units.

Previous installations that do not conform to the installation policy shall be removed by the owner upon sale of the unit.

A copy of this policy is also posted on the bulletin board by the pool.
